

AIRCRAFT STABILITY & CONTROL ANALYZER

M. I. T.

Archives Collection No. 1

Aircraft Stability and Control Analyzer  
Massachusetts Institute of Technology  
Servomechanisms Laboratory

Archives Collection No. 1

Donor: R. R. Everett, Division VI Document Room  
Restriction: MITRE Personnel

Contract: NOa(S) 5216, Project 6295

This contract was awarded to investigate the feasibility of using an electrical computing machine which would be capable of accurate, rapid, and continuous solution of equations of motion and the accompanying auxiliary equations of an airplane.

As a result of this study, the Navy awarded a contract to the Servomechanisms Laboratory to design and construct the Whirlwind I Computer.

Project Dates: November 1944 - December 1945

AC#1 contains 860 items, and is arranged in chronological order. The items in this collection are classified ~~Confidential~~ and Unclassified.
