Letter to Howard Johnson, 1980

Helsinki, June 30, 1980

Dr. Howard Johnson
Chairman
Board of Corporators
MIT
Cambridge, Massachusetts 02139

Dear Dr. Johnson:

President Kekkonen of Finland will be 80 years old on September 3 of this year. His outstanding achievements have not yet been recognized by any American college or university. Since MIT has had a close relationship with Finland, especially through its contributions to architecture, design, and engineering, a recognition of this by MIT on President Kekkonen's birthday might be appropriate.

At present I am visiting Finland for the sixth time and am the guest of my niece and her husband, Ambassador and Mrs. James Goodby. I return soon to Wellesley:
28 Dover Road, Wellesley, Massachusetts, 02181.

Sincerely yours,

Dorothy W. Weeks
