INTERNATIONAL UNION of PURE and APPLIED PHYSICS

FINANCIAL STATEMENTS

AS AT DECEMBER 31, 1969

UNION INTERNATIONALE de PHYSIQUE PURE et APPLIQUEE
INTERNATIONAL UNION of PURE and APPLIED PHYSICS

Nous avons examiné le bilan de l'Union Internationale de Physique Pure et Appliquée au 31 décembre 1969, et l'état des revenus et dépenses pour l'année terminée à cette date. Notre examen a comporté une revue générale des procédés comptables et tels sondages des livres, pièces et autres documents à l'appui que nous avons considérés nécessaires dans les circonstances.

A notre avis, le bilan et l'état des revenus et dépenses ci-annexés présentent équitablement la situation financière de l'Union Internationale de Physique Pure et Appliquée au 31 décembre 1969 ainsi que les résultats de ses opérations pour l'année terminée à cette date, conformément aux principes comptables généralement reconnus, appliqués de la même manière qu'au cours de l'année précédente.

Fortier, Langevin, Pellerin, Morin & Montreuil

Trois-Rivières, Qué.
le 3 avril 1970.

We have examined the balance sheet of International Union of Pure and Applied Physics as at December 31st 1969, and the statement of income and expenses for the year ended on that date. Our examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion the accompanying balance sheet and statement of income and expenses present fairly the financial position of the International Union of Pure and Applied Physics as at December 31st 1969, and the results of its operations for the year ended on that date, in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

UNION INTERNATIONALE de PHYSIQUE PURE et APPLIQUÉE

INTERNATIONAL UNION of PURE and APPLIED PHYSICS

Secretary-General :

Prof. C. C. BUTLER, F.R.S.,
Physics Department
Imperial College
Prince Consort Road
London S.W. 7, England.
telephone: KEN. 5111

Secrétaire général adjoint :

Prof. L. KERWIN, F.R.S.C.,
Département de Physique
Faculté des Sciences
Université Laval
Québec 10, Canada.
téléphone: 656-2131

NOTES on 1969 FINANCIAL STATEMENTS

1. Dues receivable

Since January 1st, 1970, \$4,020. of the \$6,070. outstanding at that date have been paid.

2. Accounts payable

This includes unused Commission travelling budgets.

3. Balance

Our balance of about \$53,000. is approaching one year's operating budget as desired.

4. Interest earned

This reflects the increase in that part of the Union's capital placed in an interest-bearing account last year (the amount is now \$15,000.).

5. Miscellaneous income

Return of our 1968 subscriptions to I.C.S.U.

6. Subscriptions

I.C.S.U. : \$840. - C.I.E.S. : \$200.

7. Bank charges

Included in this item are the differences between the U.S. dues of some countries and the Canadian dollars in which they were paid. We are trying to eliminate this practice.

8. Net revenue

As discussed last September, this unusual large surplus is caused by:

- a) the increase in I.C.S.U. grants of \$3,000. which had not been budgeted;
- b) the reduced Commission travel, probably caused by the fact that we had a General Assembly;
- c) a reduction in expected secretariat expenses (principally printing);
- d) a budgeted surplus of \$1,000.

IUPAP RECEIVED
OCT 13 1969
OFFICE OF THE SECRETARY

THIRTEENTH GENERAL ASSEMBLY

of the

INTERNATIONAL UNION OF PURE AND APPLIED PHYSICS

Dubrovnik, Yugoslavia 11-13 September 1969

Attendance

Academy-Research Council Delegation: Havens(Chairman)
Bromley, Herring, Koch, Wolfe-5
also Bacher, First Vice-President
Total American Participation: 6
Total Participation: 115
Number of Countries Represented: 28

Officers Elected

President: R.F. Bacher (USA)
First Vice-President: H. Maier-Leibnitz(Germ. Fed. Rep.)
Vice Presidents: G. Bernardini (Italy) re-election
S. Bhagavantam (India) re-election
W. Boas (Australia) re-election
W. Dekeyser (Belgium) re-election
A. Kastler (France)
L. Pal (Hungary)
S. Rozenthal (Denmark) re-election
V. Weisskopf (USA)
Past President on Exec. Comm.: D. I. Blokhintsev (USSR)
Secretary General: C. C. Butler (UK) re-election
Associate Secretary General: L. Kerwin (Canada) re-election

The chairmen, secretaries and members of Commissions were also elected.

Representatives of IUPAP to other international organizations were designated.

R. F. Bacher was designated the IUPAP representative on Exec. Comm. of ICSU.

Administrative Actions

Admissions:

Cuba and South Korea were admitted to the Union.

Dues:

Unit contributions increased from \$250 to \$300 (This increases the USA annual dues from \$3000 to \$3600)

A new Commission on Plasma Physics was formed.

A list of conferences to be sponsored by IUPAP in 1970 was approved.

Resolutions were passed as follows:

a) The Secretary General prepare a paper on criteria for International Conferences, incorporating the USA proposal that meetings be sponsored in three different categories.

b) The Commission on Low Energy Nuclear Physics be redesignated the Commission on Nuclear Physics.

c) The Commission on High Energy Nuclear Physics be redesignated the Commission on Particles and Fields.

d) The Herzberg Resolution: The General Assembly of IUPAP while urging authors of scientific papers to adopt the recommendations of the SUN commission strongly suggests to editors of scientific journals not to insist on rigid adherence to any particular system of units as a condition for publication.

e) A series of resolutions proposed by the Commission on Physics Education as follows:

1) Research and education be carried on in the closest possible association;

2) Any tendencies toward divergence between the activities of advancing and of disseminating knowledge be vigorously counteracted and efforts to improve the teaching of physics be encouraged;

3) Excellence in teaching and in the dissemination of knowledge about physics should receive the same recognition as excellence in research. In this connection, all sponsoring agencies and foundations should give financial support for the preparation of critical reviews of current developments and for the compilation of critical data;

4) Talented research workers be expected to teach, and their exemption from teaching occur only in special circumstances and not as a reward for excellence;

5) Teachers be encouraged to maintain their intellectual vitality and participation in the advancement of knowledge by being given time for research or for closely related scholarly activities; and

6) Research workers in Research Institutes and Industrial Laboratories should collaborate with Academic Institutions in the training and education of advanced students in Physics.

Date and Place of Next Meeting:

The decision was left to the Executive Committee; invitations have been received from East Germany (Leipzig), Spain (Madrid), Sweden (Stockholm), USA (Washington).

Comments on the IUPAP General Conference by W. W. Havens, Jr.:

Prior to the first meeting of the General Conference, the USA Delegation held a meeting with R. F. Bacher who had attended a meeting of the Executive Committee on Wednesday, the 10th of September. Bacher informed the Delegation that the Executive Committee had not accomplished nearly as much as expected because C. C. Butler, Secretary General of IUPAP, had not arrived until after lunch because of his unfortunately missing a plane connection. The meeting of the Executive Committee was rather rushed and adequate consideration could not be given to all points raised.

Bacher stated that he had raised the visa question, however no one on the Executive Committee except the USA Delegate was at all concerned about the visa problem and Bacher did not think this problem should be introduced at the General Assembly. Bacher was of the opinion that the USA Delegation had suggested too many candidates for membership on IUPAP Commissions. The large number of candidates suggested for the purpose of giving the Executive Committee some choice just led to confusion. In the future, Bacher thought it would be better to propose fewer candidates for membership on Commissions, and attempt to have the Commissions themselves propose USA candidates as well as USA candidates being proposed by the National Delegations.

The tradition of membership on IUPAP Commissions is for a man to have two 3-year terms, therefore unless a man resigns from a Commission he will be re-elected for a second term. In the future, the Chairman or the Secretary USA National Committee should determine at least one year in advance of the next meeting of the IUPAP General Conference, the names of the individuals whose terms are likely to expire and inform the USA member of the Commission. The USA member of the Commission should suggest to the Chairman of the Commission, with a copy to the USNC Secretary, an appropriate replacement for the individual whose term is likely to expire. In this way the individual whom the USA would like to nominate will be supported both by the Commissions themselves and by the USA National Delegation, increasing their probability of being appointed. Bacher thought there would be no difficulty in achieving the USA Delegation's objective of having at least one USA member on each of the Commissions, however the USA member might not be the individual the USA Delegation had suggested.

Bacher said that the Executive Committee like the suggestion that the USA Delegation had made about supporting meetings in three different categories, and suggested that a formal resolution be submitted by the USA Delegation at the General Conference. He also thought there would be no objections to changing the titles of the Low Energy Nuclear Physics Commission to the Nuclear Physics Commission and the High Energy Nuclear Physics Commission to the Commission on Particles and Fields, and suggested resolutions on these changes be introduced.

At the formal meeting of the Thirteenth General Assembly, reports were submitted by the Commissions either in writing or orally. Most of the discussion centered about the recommendation of the SUN Commission that editors require authors to use the symbols agreed on by the SUN Commission, and resolutions introduced by the Commission on Physics Education to support more adequate recognition of excellence in teaching of physics and the connection between education and research.

The resolution introduced by the USA Delegation on supporting meetings in different categories and changes in the names of the Commission on Low Energy and High Energy Nuclear Physics were accepted with very little discussion. The resolutions on meetings are to be incorporated in the report on criteria for international meetings to be written and distributed by the Secretary General and the names of the Commissions are being changed subject to approval of the present Commissions. At least one USA representative was elected to each of the IUPAP Commissions. In general the USA Delegation accomplished almost all of its objectives at the General Conference of IUPAP.

The Executive Committee met after the General Conference was completed, for a short period of time. Bacher informed the USA Delegation that IUPAP had not formally accepted the invitation of the United States to hold the next Conference in Washington, in September 1972. However he was advised informally, that he should proceed with preparations for the 1972 Conference. Bacher mentioned to the Executive Committee that the USA intended to have a scientific meeting along with the General Conference of IUPAP and this idea received the general support of the Executive Committee. The Executive Committee thought it best to hold these scientific meetings through the IUPAP Commissions. Bacher stated that the Russians had objected strenuously to holding the 1972 General Conference in Washington on the grounds that it was too dangerous to participants in the Conference to hold a scientific meeting in Washington. Other members of the Executive Committee appeared to view this as the natural objections of the Representatives of the USSR to holding a IUPAP Meeting in the USA

Respectfully submitted,

W. W. Havens, Jr.
Chairman, USA Delegation

I.U.P.A.P.
Executive Committee
Minutes of the meeting of September 10th, 1969 (pre-General Assembly)
Dubrovnik, Yugoslavia.

I - The Executive meeting convened at 10:15 in the Trade Union Building of the old city.

President Blokhintsev presided.

Were also present: Prof. Robert BACHER, Dr. S. BHAGAVANTAM, Dr. Walter BOAS, Prof. M. DANYSZ, Prof. W. DEKEYSER, Prof. S. ROZENTAL, Sir Gordon SUTHERLAND, Prof. C.C. BUTLER (from item IX to the end), and Prof. L. KERWIN.

Also in attendance was Mr. KOCHETKOV, secretary and interpreter for Prof. Blokhintsev.

II - President Blokhintsev welcomed the members to Dubrovnik and to the meeting.

III - On a question of privilege, Dr. Boas raised the point of members of the Executive Committee being represented not only in this capacity but also as members of their national delegations, and inquired as to the possibility of a conflict of interest. The President reminded members of the Executive that they had been elected by the General Assembly as delegates of the General Assembly and did not represent their national delegations at the Executive.

He further stated that it was not desirable that Executive members be members of national delegations for voting purposes, although it was customary for some national delegations to include their names on its list.

IV - The Associate Secretary-General presented a consolidated audited account for the three-year period 1966-1968. The yearly statements had all been examined previously and the Executive approved the three-year consolidation.

V - The Associate Secretary-General then presented the state of the 1969 budget. This promised to show a surplus of about \$9,000. caused principally by an unexpected increase in the ICSU allotment, and an equally unexpected decrease in Commissions travelling requirements. He also reported the matter of a request for an increased grant by the organizers of the Accelerator Conference in the USSR. Members of the Executive consider that this was undesirable, left the final decision to the Secretary-General and the Associate Secretary-General who would review the circumstances.

VI - The Associate Secretary-General reported that few countries had taken a position on the proposed increase in the unit fee. Of the 91 votes in the Union, 35 had been registered as being in favor and 1 against. Some of those in favor expressed that their consent was conditional on their government's voting the funds. The Executive decided to recommend the increase to the General Assembly.

VII - The Associate Secretary-General presented a proposed budget for 1970.

The Executive decided:

- a) not to press for an increase in the unit fee for 1970;
- b) not to set up, for the time being, a more extensive secretariat;
- c) nevertheless to provide for increased publicity such as six issues of the News-Bulletin instead of four, etc.

Final approval on the 1970 budget was deferred until after the General Assembly.

VIII - The question of the 3-year budget was discussed in some detail.

Working documents included a list of the grants spent by various commissions during the past six years and their probable extrapolation for the next three years. The Executive decided that the amounts suggested for each commission should be given to them as a guide line for the next three years, but that they be informed that the Executive would continue to examine the requests on a yearly basis.

IX - The Secretary-General reported on nominations received for Executive positions.

A list of these had been circulated to Executive members. After some discussion, the slate of officers to be presented by the Executive to the General Assembly was agreed upon, and measures taken for its distribution to the delegates.

(The matter of the nominee for first vice-president causing some difficulty, the Executive requested Sir Gordon Sutherland to obtain further information on the availability of candidates. At a special short Executive meeting convened on Thursday, September 11, at 9:45 a.m., just prior to the General Assembly, Sir Gordon reported to the Executive Committee, whereupon the name of Prof. Maier-Leibnitz was included in the slate for this position.)

X - The Secretary-General reported on the nominations received for positions on the international commissions. After much discussion, the slate of members to be proposed to the General Assembly was agreed upon, and measures taken to have the slate distributed to the delegates.

- XI - The Secretary-General reported on the measures taken to secure nominees to the various inter-unions and ICSU commissions. He reported that the joint commission on Applied Radioactivity had been abolished by ICSU. A slate of proposed nominees to these various commissions was agreed upon, to be circulated among the delegates prior to the General Assembly.
- XII - The Secretary-General presented a report on the international conferences presented for sponsorship and, in many cases, grants by the various commissions, and several requests for sponsorship which had been made directly to the Executive Committee. A list of those for which the Executive Committee recommended sponsorship was agreed upon to be presented to the General Assembly. The awarding of grants was deferred until after the General Assembly had acted. A short list of proposed conferences for 1971 was also approved for presentation to the General Assembly.
- XIII - The Secretary-General reviewed a number of miscellaneous items which were to come up before the General Assembly.
- a) A proposal for the exchange of information between commissions and member countries (Hungary);
- The Executive thought that this proposal would require far too much detailed work by the Secretaries of the Commissions, and would recommend to the General Assembly that a less detailed exchange be recommended.
- b) Criteria for the sponsorship of the conferences;
- It was agreed to submit the paper prepared by the Associate Secretary-General for the approval of the General Assembly.
- c) Categories for international conferences (USA);
- The Executive agreed that this procedure would be useful.
- d) Liaison with European Physical Society;
- It was agreed that this should be done on a formal basis and that Prof. Butler be the Union's delegate to the E.P.S.
- e) Recommendations by the Education Commission concerning teaching and research;
- The Executive saw no objection to this recommendation being brought before the General Assembly.
- XIV - The meeting was adjourned.

Larkin Kerwin,
Associate Secretary-General

I.U.P.A.P.
Executive Committee
Minutes of the meeting of September 13th, 1969 (post-General Assembly)
Dubrovnik, Yugoslavia.

.....

I- The meeting convened at 14:30 with President Blokhintsev in the Chair.

Present were: Prof. Robert BACHER, Dr. S. BHAGAVANTAM,
Prof. W. BOAS, Prof. M. DANYSZ, Prof. W. DEKEYSER,
Prof. S. ROZENTAL, Sir Gordon SUTHERLAND,
Prof. C.C. BUTLER, Prof. L. KERWIN,
as well as new members of the Executive Committee:
Prof. L. PAL, and Prof. Alfred KASTLER.

II- The minutes of the September 1968 meeting held in London were approved, one correction being noted (page 4, the name Julich to be substituted for Tiflis).

III- Place of the 1970 Executive meeting was discussed and it was agreed to accept the kind invitation of Prof. S. Rozental to meet in Copenhagen, at the Niels Bohr Institute.
Dates of the meeting would be Friday and Saturday, September 25th and 26th.

IV- The budget for 1970 was approved (see Appendix I). It was agreed to budget \$38,000. for conferences, as well as for a surplus of \$2,000.

V- The list of conferences to be sponsored for 1970 as received for the General Assembly was examined and the budget of \$38,000. distributed among them (see Appendix II). The main problem arose in the matter of the Cosmic Ray Conference to be held at Hobart, Australia. Several members of the Executive questioned the wisdom of holding an international conference there as well as the heavy expenditure proposed.
It was decided to write to the Cosmic Ray Commission suggesting that they recommend which amount of their three-year allocation for 1970-71-72 they wish to set aside for this Conference. It was felt that this financial problem might influence the site proposed.

- VI- The Executive next took up the matter of the publishing of its tri-annual book of general information. The nature of the content to be included was reviewed and it was noted:
- a) that the criteria of conference sponsorship should be included;
 - b) that as much matter as possible should be placed in appendices so as to reduce the content that would be bilingual;
 - c) that more information on commissions and their membership might be included.
- VII- The Executive then spent considerable time discussing its relations with ICSU, the theme of the discussion being the desirability of greater contacts with the Council and greater participation in its activity. Among other things, suggestions were made concerning:
- a) greater liaison (more systematic exchange of documents; the problem of having ICSU's meetings at more suitable dates to permit IUPAP's attendance, etc.);
 - b) conflict of dates (it was agreed to try and have ICSU and IUPAP plan their meetings for 1972 onwards, with a view to meeting in the same city on succeeding dates so as to permit greater IUPAP participation. It was felt that this could be extended to other unions and gradually quasi-simultaneous meetings of many unions might be held just prior to or following ICSU meetings);
 - c) it was agreed to seek up opportunities for nominating IUPAP members to office in ICSU with an eye to some time in the future nominating an ICSU president;
 - d) it was agreed that Dr. Boas would be the Union delegate to the coming ICSU Executive meeting in Erevan and that the Secretariat would immediately contact the ICSU office in Rome to make the necessary arrangements.
(subsequently, the ICSU office was contacted and the necessary arrangements were made).
- VIII- It was agreed that Norway, Switzerland, and the USSR should be pressed to accept more shares in the Union, in line with policy previously outlined by the Executive.
- IX- The lieu of the 1972 General Assembly was then considered. Invitations had been received from Washington, from Stockholm, from East Germany, and from Spain. On the credit side, all of these cities were very attractive, would insure good arrangements for the delegates and the secretariat, and had extended cordial and warm invitations. On the debit side, Washington might prove a bit costly, Stockholm had been visited recently by the Executive, a meeting in East Germany would follow immediately upon a General Assembly meeting in an Eastern European country, and the weather in Madrid might be inclement. A consensus of opinions was that the Executive might decide on Washington, but the final decision was deferred until the Copenhagen meeting.

- X- Prof. Kastler raised the point of the planning of commission travel expenses. It was pointed out that these were now arranged on a three-year basis.
- XI- Prof. Kastler raised some questions concerning the voting procedure used at the General Assembly. He expressed the feeling that many delegates would prefer to use a formal balloting procedure on some questions. While this was provided for in the Union's Statutes, in practice the counting of ballots presented some technical difficulty. It was agreed that the Secretariat would study this matter and bring forth recommendations at the Copenhagen meeting.
- XII- President Blokhintsev expressed the thanks of the Executive to the Yugoslavian hosts for their warm welcome and their generous hospitality to the members of the Executive Committee. He also expressed his gratitude to the members of the Executive Committee for their collaboration during his term of office as well as his warm best wishes to his successor, Prof. Robert Bacher.
- XIII- The meeting then adjourned.

Larkin Kerwin,
Associate Secretary-General

IUPAP

I.U.P.A.P.

INTERNATIONAL UNION OF PURE AND APPLIED PHYSICS

News-Bulletin No. 14

October 1969

NEW COMMISSION: PLASMAS

A new international Commission - on Plasma Physics - was created at the Dubrovnik General Assembly of IUPAP in September.

For many years, an international committee has organized highly successful conferences on ionized gases. At the 1966 General Assembly, this field of Physics was given representation as a sub-commission of the international Commission on Atomic and Molecular Physics and Spectroscopy. At the unanimous request of the Ionized Gases Committee and with the approval of the AMPS Commission, the Plasma group has now been given Commission status.

It will be responsible for coordinating Union activities in the general field of plasmas and ionized gases, and for recommending various international conferences for Union sponsorship.

The President of the new Commission is Dr. L.A. ARTSIMOVICH, while its Secretary is Prof. S.C. Brown. Drs. H. Maecker, R.F. Post, R.S. Peace, H. Alfen, K. Husimi, and I. Popescu are Commission Members.

Drs. I. Bhatnager, E.K. Pekarpk, L. Rothhardt, M. Braans, M. Brunelli, J.L. Delcroix, and E. Weibel are corresponding members.

NEW JOURNAL : "FIZIKA"

The first issue of a new Physics Journal - "Fizika" - was presented to delegates to the IUPAP General Assembly in September. The Journal is published jointly by the Yugoslav National Committee for IUPAP and the Yugoslav Union of Mathematical and Physical Societies. Editor of the Journal is Prof. A. Moljk of the University of Ljubljana. Papers are published in several languages, the first issue containing articles on a wide variety of fields of Physics. "Fizika" is the first regular Physics Journal to be published by a IUPAP National Committee.

NEW PRESIDENT: Robert BACHER

Professor Robert Bacher, Provost of the California Institute of Technology, was elected to succeed Prof. D.I. Blokhintsev of the U.S.S.R. as President of IUPAP at the Dubrovnik General Assembly. Prof. Bacher becomes the 10th President, since Union reorganization in 1922.

Prof. H. MEIER-LEIBNITZ of West Germany was elected first Vice-President. Prof. Meier-Leibnitz is currently director of the joint France-West Germany Nuclear Laboratory at Grenoble.

New Vice-Presidents are: Prof. André KASTLER (France), Prof. L. PAL (Hungary), and Prof. Victor WEISSKOPF (USA).

Prof. Clifford BUTLER, F.R.S., was reelected to the office of Secretary-General.

NEW NAMES: the NUCLEAR COMMISSIONS

Designation of the Nuclear Commissions has been changed by the General Assembly as a result of a resolution introduced by the US delegation.

The Commission on Low Energy Nuclear Physics will henceforth be known as the INTERNATIONAL COMMISSION for NUCLEAR PHYSICS, while that on High Energy Nuclear Physics will be called the INTERNATIONAL COMMISSION on PARTICLES and FIELDS.

NEW MEMBER: SOUTH KOREA

South Korea was unanimously voted in as IUPAP's 38th member country at the 13th General Assembly. South Korea will have one unit and one vote in the Union.

The Assembly also ratified the membership of Cuba, previously admitted by Executive action.

NEWS

Following News-Bulletin No. 13, please note the dates of the following conferences:

Radiation Damage (13a): August 24-26

Precision Measurements (14): August 3-7

Semiconductor Heterojunctions (15):

October 11-17,

I.U.P.A.P.

At the General Assembly held in Dubrovnik, Yugoslavia, in September, Union delegates extend the patronage of the Union to the following international conferences to be held in 1970.

Where no source of information is listed, inquiries should be directed to the Secretary of the appropriate international Commission.

PLEASE KEEP THIS ISSUE OF THE
NEWS-BULLETIN FOR REFERENCE

U.I.P.P.A.

IUPAP

Lors de la récente Assemblée générale de l'Union tenue à Dubrovnik, Yougoslavie, en septembre, les délégués ont accordé l'appui de l'Union aux congrès internationaux de 1970 dont la liste apparaît ci-après.

Dans le cas où on ne mentionne pas de source d'information particulière, les intéressés sont priés de s'adresser au Secrétaire de la Commission internationale appropriée pour obtenir des renseignements supplémentaires.
