

ATHENA DEVELOPERS /
DELIVERY REL FACULTY

I'm not sure how accurate the information you want needs to be but this is the best I could do under the circumstances. If you have any questions please get in touch with me.

I have enclosed 4 lists. Let me describe the lists I have enclosed and how they were put together.

The first list of Athena Principal Investigators is comprised of (117) persons who have been given Athena funding since the inception of the Project. (A few of them may have left the Institute and a few others may no longer be actively developing software at this point.)

The second list was culled from a survey done in the spring of 1988. (We sent surveys (copy included) to about 256 faculty developers/instructor/cluster managers and got only 80 responses. The second list contains the names of persons (not all of them faculty members) who indicated that they were using Athena for "ongoing development of instructional software". (Let me mention that I had wanted to contact the (176) persons who did not respond but could not due to lack of resources.)

The third list was put together from records of subjects that requested to use our facilities/resources and subjects that had used the facilities in previous years. Caveat: it may contain subjects that did not (eventually) use our facilities and it may not indicate who actually taught the subject--if they did use our facilities.

The fourth (and final) list was put together from the aforementioned survey and contains the names of persons (again, not all of them faculty members) who indicated that they were using Athena for "delivery of instructional software".

I hope you find the information helpful. Do not hesitate to contact me if I can be of further help.

Sincerely,

Ademola Aderibigbe
