Dear Mrs. Wiener:

I am enclosing a copy of a letter that we have just received from Mr. Chatani with a photograph of you and Mr. Chatani and Dr. Ikehara during one of your visits to Tokyo.

Mr. Severance and I both thought it very kindly of Mr. Chatani to send the note and the picture. We also thought that you might yourself like to have this remembrance. I hope you will want to keep this token of esteem from one of your Japanese friends and I am taking the liberty of telling Mr. Chatani that we have sent the picture and letter on to you.

Sincerely yours,

Fred G. Lehmann

Gentlemen:

We have greatly appreciated the reprints you have sent to Professor Wiener throughout the years. However, as you may not be aware of the fact of his death in March 1964, I thought I should bring it to your attention -- especially as this office will be dissolved in a few weeks. I should therefore like to ask you to strike Professor Wiener's name off your mailing list.

15-th of July 1964 .

Dear Mrs Ritter

I duly received your kind letter of the 29-th  
of April (addressed to my Paris home ) and I thank you very much .

I ~~thought~~ <sup>thought</sup> it more advisable not to disturb and  
to wait a little until Mrs WIENER takes a final decision in this  
important matter...

I am ~~in~~ now for another fortnight-in Switzer-  
land , and I take the liberty to ask you to kindly inform me , if it  
does not disturb you , and to let me know whether I could do something  
-if Mrs Winer wishes , in order that the two-volume Autobiography  
(" Ex-Prodigy and I am a Mathematician " ) should be translated  
and published in Paris ? If Mrs Wiener decided to apply to  
another French Publisher who previously ~~is~~ published 1 or 2 of the  
scientific books , I am, of course, ready to help , and to come  
in touch with the Publisher in question . ~~And~~ <sup>And</sup> to agree with him,  
as usually done in such case, about the translation . If Mrs  
Wiener is willing to entrust the matter to another leading Paris  
publisher , I shall do all the necessary preliminary <sup>steps</sup>  
steps ~~and~~ and bring Mrs Winer in direct communication ( or  
bring the U.S.A. Publisher in direct communication with Paris ) -  
in order that both should agree, as usual, about the rights , etc .  
~~This~~ <sup>This</sup> is the same Publisher for whom I finished to translate the  
autobiography of the famous U.S.A. scientist ( Nobel Prize winner ) -  
Professor Selman A. WAKSMAN ... Please excuse me to write in haste.

I shall be back in Paris end of this month . Awaiting your good

news , and thanking you in advance,

Yours Sincerely,

Dear Mrs. Ritter:

Thank you very much for offering to help us with our bulletin board display in memory of Professor Wiener. I can understand your concern for the safekeeping of the material you might send, but I assure you that we will be extremely careful of it. We will put all of it in glass cases which will be locked securely, and will insure the package when we mail it back to you.

Professor Eugene Kopp, Associate Professor of Engineering, who was once a student of Dr. Weiners, was the person who came to me and suggested the display. When I asked him what he thought would be appropriate, he listed the following:

Manuscripts of books, particularly handwritten or typewritten with handwritten comments.

A copy of "Extrapolation, Interpolation, and Smoothing of Stationary Time Series" as originally published in second World War by Navy Department.

Tributes to Dr. Wiener from other sources.

✓ Reprints of his articles, particularly early ones that our library might not have.

Tape recordings of his lectures and photographs of his blackboard notes.

Chess set and playing cards.

If it would be convenient with you to send this material by Sept. 8, we would be able to have the exhibit ready by the time school starts this fall. Thank you again for your cooperation. I am sure that by working together we can produce a display that will truly honor Dr. Wiener.

Sincerely yours,

Dear Mrs. Wiener:

Enclosed are the old pictures of Dr. Wiener and yourself that you so kindly loaned us, along with a set of copies such as we had made for our files. I am sorry not to have returned them sooner.

I must also apologize for not having sent you the clippings. This summer has been such a busy one that we never seem to find time to do all the things we should do. But we will send them soon.

I hope you are having a comfortable summer though I am sure it must be a sad and lonely one.

Dear Mrs. Wiener:

Syracuse University is sponsoring a continuing program designed to make the papers and manuscripts of prominent Americans available to scholars. Your husband had a distinguished career in mathematics and science and it is, therefore, only fitting that his manuscripts should be permanently preserved in a research institution such as ours. In recognition of his work and achievements, we hope you will give us the opportunity to establish a Dr. Norbert Wiener Manuscript Collection as a lasting memorial. This collection would also be an important historical resource for the faculty and students of our College of Engineering and for the scholarly world in general. Researchers will thus be given insights into historical trends and events which otherwise might have been denied them.

The collection would include letters and general correspondence files, personal records, journals and diaries, manuscripts of essays, books, and articles, papers relating to interests, associations, activities, family and friends, and documents concerned with his research and studies relating to automation. At Syracuse University Library, the manuscripts will be kept in a room especially planned for the maintenance of research collections. In addition, the papers will be processed and placed in order, shelved in fire-resistant archival boxes, and inventoried enabling scholars to realize the nature of the collection. The use of such material is governed by an agreement made between the University and the donor.

Will you and other members of the family please give our suggestions serious consideration and then let us know your thoughts on the matter.

Cordially yours,

Howard L. Applegate  
Administrator of Manuscripts

*Please acknowledge receipt of letter and say if shall consider their offer at the time when I ~~have~~ <sup>will</sup> make a decision where the papers are to go.*

Dear Mrs. Hawk,

In response to your letter of July 21, I have collected a few items for your bulletin board display.

Included are 8 of the oldest reprints I have, 7 photographs, a few old newspaper clippings and a xeroxed copy of a handwritten manuscript page from the Tempter.

You will understand that we cannot send whole manuscripts of books or articles. And unfortunately, we don't have a copy of the book you requested -- the Navy Department's "Extrapolation, Interpolation and Smoothing of Stationary Time Series", then known, on account of its yellow cover, as the "yellow peril". I hope that the included material will be useful. His books you will have in the Library anyway.

Might I just ask you one favor then, namely that you return everything I have sent you, with the exception of the reprints, if you like to keep them, to Mrs. Wiener in New Hampshire?

I am quite sure that you will take good care of the material. Thanks to the cut-outs you have sent me, I now have a fairly good idea of your Library, which is very attractive indeed. I wish you good luck with your display.

May I thank you for the letter you sent to Professor Wiener in response to God & Golem, Inc. I gather from your letter that you are not aware of the fact that Professor Wiener died on March 18 in Stockholm, Sweden. I think he would have enjoyed your comment.

As to the mistake on page 13, we did discover it, but unfortunately too late. It should read "ontogeny".

Dear Mrs Ritter,

We are all still very sad about the death of our  
beloved Norbert Wiener.

As you know we are preparing a memorial volume which  
will contain the last lectures he prepared in Amsterdam :20 contributions  
by eminent scientists in the field and also his full bibliography. I have  
in my office a mimeographed list of his papers up till 1959. Would you be  
so kind to send me a list of his papers of the last few years ?

Thanking you very much in advance, and with kindest regards,

August 24, 1964

Dear Dr. Schade,

I have received your letter of August 17 and am sending you the last two pages of the List of Publications. As you have the old list, you may simply replace the last page (13) with pages 13 and 14 to bring it up to date. Some papers, we discovered, are not listed, one of them being the "Fourier Transforms in the Complex Domain"(with R.E.A.C. Paley), Am. Math. Soc. Colloq. Publications, Vol.19, 1934.

We are in the midst of clearing out the office which will have to be vacated for the new term. It's a sad and confusing job.

Mrs. Wiener told me that just before her return to the U.S., a registered letter arrived from Sweden the postage of which was quite considerable. As she has not heard from you with regard to this letter, I wonder if you could tell us what it contained and/or if Mrs. Wiener owes you or the Institute some money for it. Would you let me know?

We are still receiving mail here; besides the Math Dept. will always know where to reach me. As you probably know, Mrs. Wiener is spending her summer in South Tamworth, New Hampshire and she has decided to stay there through the winter if she can manage.

With best regards,

Yours sincerely,

Dear Mr. Tangen:

I have received your letter of June 2 and would like to thank you for your expression of sorrow as well as for the high regard you had for my late husband.

I have read your letter carefully giving due consideration to your proposal of a Wiener Trust and a Wiener University. I regret to tell you, however, that I have reservations about plans of this sort and that I shall not give my consent for the use of the Wiener name in connection with your plans.

Being aware of the respect you had for my husband, I know that you will understand if I have to refuse.

As we are in the last stages of closing out the office of Professor Norbert Wiener, I wonder if you might be able to help us in ascertaining how many translation rights, if any, have been granted of I Am a Mathematician; also, how the distribution of rights is in this case, for although the MIT Press has republished this book, I believe you still hold some shares. Another book in question is The Human Use of Human Beings, of which the pocketbook appeared in the Anchor Series.

Mrs. Wiener is now the sole recipient of Professor Wiener's royalties and it would make it a lot easier for her if she had a complete file of her rights.

Would you be so kind as to send any information you might have to Mrs. Margaret Wiener, South Tamworth, New Hampshire.

As we are in the last stages of closing out the office of Professor Norbert Wiener, I wonder if you might be able to help us in ascertaining how many translation rights of his book The Human Use of Human Beings have been granted and to how many countries. Would you also look into the distribution of rights and shares.

Is it also possible to check how many copies have been sold since date of publication?
